About Safe-Tech

Safe-Tech is a young company created by third-generation entrepreneurs that offers Computer Security and Data Network managed services in a turnkey manner.

Vision

Position the company within a select group of organizations that have a global presence in the tech-world. Have the technical and operational capacity to manage Computer Security Services under the highest standards, meeting the demand and needs of our clients, the market and the country.

Mission

Provide services of the highest quality that allow our clients to benefit from IT. Take full advantage of available opportunities and resources without having to worry about problems associated with computer security and business continuity. Translate our clients' investments into economic savings and potential profit increase.

Values & Approches

S Synergy	T Technology
A Availability	E Efficiency
F Focus	C Confidentiality
E Expertise	H Honorability

Computer Security Brief

Security breaches caused by the use of the Internet result in organizations being exposed to computer security problems and threats. Every day, a growing number of organizations dedicated to Cybercrime activities and the exploitation of technological infrastructure vulnerabilities generate economic benefits through the illegal practice of Cybercrime.

Everywhere**

Data Network

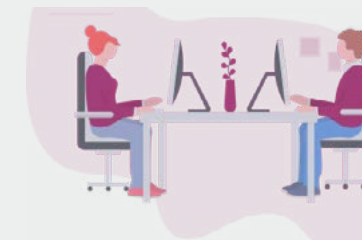

Today the internet is one of the main service enablers of organizations. At Safe-Tech, we offer the best technologies for Data Network solutions and thus optimize and guarantee that the infrastructure is highly efficient, has high performance and operates under the minimum consumption of network resources.

- EFFICIENT CONSUMPTION OF RESOURCES
- EFFECTIVE INTERNAL AND EXTERNAL COMMUNICATION
- NETWORK VISIBILITY
- LOGICAL AND PHYSICAL SEGMENTATION FOR BETTER NETWORK CONTROL
- PRIVACY AND DATA SECURITY
- GROUPING OF NETWORKS BY WORK AREAS

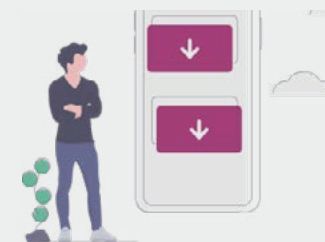

WLAN Networks

Implementation and Management of wired Networks that allow the improvement of configurations attached to your daily operation.

LAN Networks

Keep all the worker's computers at your company connected under the same line, giving them access to network resources from anywhere in the company without the need for cables.

Network Cores

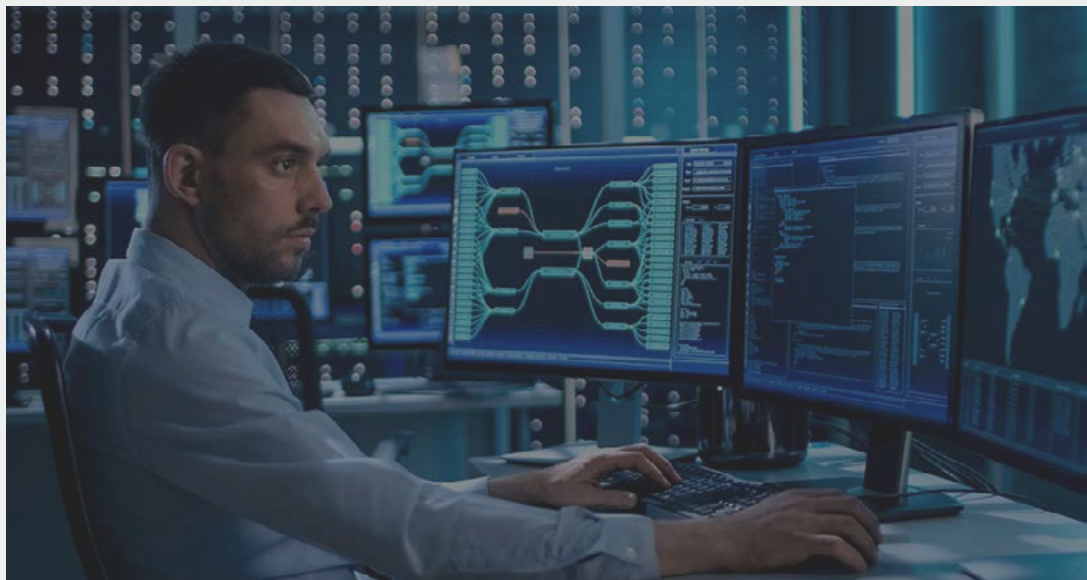

Managed services for the implementation of switching solutions for high port and information density, which provide effective communication in all areas of your organization.

SOC-NOC

The monitors of SOC-NOC manage and support any technological component and infrastructure in order to have a proactive response to any event that may compromise performance, security, and availability under a 24/7/365 scheme.

SOC-NOC Benefits:

- REAL-TIME VISIBILITY OF THE CONSUMPTION OF INFRASTRUCTURE RESOURCES
- REAL-TIME VISIBILITY OF ASSET AVAILABILITY
- REAL-TIME VISIBILITY OF SECURITY THREATS
- PROACTIVE RESPONSE TO SECURITY AND CONTINUITY EVENTS
- MITIGATION OF SECURITY BREACHES
- IDENTIFICATION OF OPPORTUNITY AREAS
- GLOBALLY CERTIFIED SERVICE
